VAMSHI KRISHNA KORUTLA

AI Business Analyst | Requirements, Process & AI Adoption | SQL · Power BI · Generative AI

korutla.vk@gmail.com | Dallas, TX · Open to relocation | linkedin.com/in/vamshi-korutla | vamshi-ai.me

PROFESSIONAL SUMMARY

Business analyst with 5+ years across healthcare, biotech, and consulting (Deloitte, Cardinal Health, Solid Biosciences) who turns ambiguous business problems into clear requirements, decisions, and measurable process change. Uses Generative AI daily to accelerate analysis, documentation, and reporting, with human review built in. Experienced at translating between technical teams and leadership and presenting data-backed recommendations to executives.

CORE SKILLS

Business Analysis: BRD/FRD, process mapping, requirements traceability, gap analysis, UAT, business cases, ROI analysis, KPI design

AI & Automation: Generative AI, Microsoft Copilot, LLM-assisted analysis and documentation, AI use-case intake, human-in-the-loop review

Data & Tools: SQL, Power BI, Tableau, Excel, Snowflake, Azure, AWS, Jira, Confluence; executive reporting and presentations

PROFESSIONAL EXPERIENCE

Feasto Solutions LLC | *AI Business Analyst Intern* *Sep 2026 – Present*

- Analyze AI-enabled business processes and translate use cases into BRDs, process maps, data requirements, human-review points, and risk/compliance considerations supporting responsible automation.
- Support data governance and AI risk activities by documenting data-quality dependencies, ownership, decision logic, controls, and monitoring needs so stakeholders can evaluate AI opportunities with traceable evidence.

Solid Biosciences | *Business Analyst* *Jul 2025 – Jan 2026*

- Built Power BI and SQL validation/reporting workflows that improved reporting accuracy and consistency by 35% and reduced turnaround time by 25%, strengthening confidence in operational decisions.
- Served as a data SME in a compliance-driven biotech environment, documenting business logic, requirements, acceptance criteria, process changes, and UAT evidence to create traceable, implementation-ready workflows.
- Applied Generative AI to requirements documentation, meeting summaries, and reporting automation while maintaining human review and validation.

Cardinal Health | *Business Intelligence Analyst* *Jan 2025 – Jul 2025*

- Developed SQL and Power BI reporting on Snowflake and Azure data, improving executive reporting accessibility by 30% and reducing data inconsistencies by 25% through validation and reconciliation controls.
- Used Microsoft Copilot and Generative AI for documentation and reporting automation; supported business cases, ROI analysis, and stakeholder decisions on technology-enabled process improvements.
- Performed gap analysis, requirements traceability, process mapping, data validation, UAT, and defect documentation, connecting business requirements to testing and deployment outcomes.

Deloitte | *Operational Analyst – Healthcare* *May 2020 – Jul 2024*

- Standardized SQL validation (including Snowflake sources) and Power BI reporting, improving reporting efficiency by 30% and reducing data inconsistencies by 25% across enterprise operational datasets.
- Partnered with business and technology teams on root-cause analysis, requirements, Agile delivery, UAT, and issue tracking in Jira/Confluence, turning operational risk and data gaps into measurable process improvements.
- Maintained functional specifications, workflow documentation, data dictionaries, and governance artifacts, improving compliance readiness and documentation quality by 20% across healthcare reporting workflows.

SELECTED AI PROJECT

Responsible AI Governance & Safety Evaluation Framework *Independent Portfolio Project · 2026*

- Designed an end-to-end governance blueprint for Generative AI use cases (intake, risk tiering, human approval gates, change control, incident escalation, audit evidence), mapped to NIST AI RMF and ISO/IEC 42001.
- Defined an evaluation and monitoring scorecard for quality, hallucination/error rate, harmful-output risk, privacy leakage, bias/fairness, robustness, and drift, with go/no-go thresholds and recurring review workflows.

LEADERSHIP

Founder, Namaste Cultural Community Organization *Northeastern University · 2024 – Present*

Founded and scaled a cultural community bringing students together across backgrounds through large-scale events and peer support programs at the Roux Institute.

Student Ambassador | Community Events Manager *Northeastern University · 2024 – Present*

EDUCATION & CERTIFICATIONS

Master of Science in Data Analytics – Northeastern University | **Bachelor of Science** – Kakatiya University

Certifications: Google Advanced Data Analytics Professional Certificate | AWS Certified Solutions Architect – Associate
